comparison DVD-ROM

The new edition of vrt-dvd 2008!

A completely new developed software with simplified menu guidance, uniform representation of the data sheets, new data base structure those also allows now a selection for parametrics with transistors, diodes, thyristors and FETs. The data base contains the data of electronic components like integrated circuits, transistors, diodes, FETs, thyristors, UJTs., with all important details, as well as the access to the original of data sheets in the pdf format over our InterNet server.

Contents:

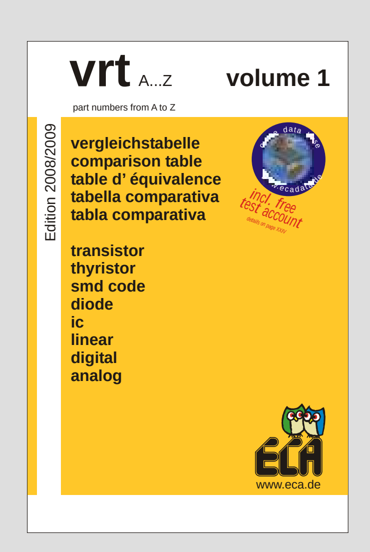

- over 85.000 diodes
- over 50.000 FETs
- over 125.000 transistors
- over 17.000 thyristors
- over 95.000 integrated circuits divided into different data sheets.
- SMD-Code table
- Manufacturer informations
- Access to the original data sheets in PDF format if available
- Online access to the vrt data base at www.ecadata.de for all registered customer for one year.
- Multilingual: german, english, french, spanish, portuguese, turkish, italian

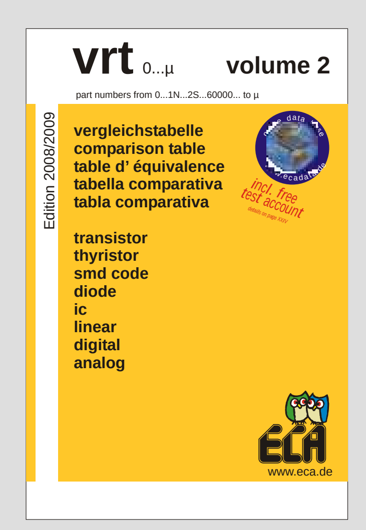

This new dvd now includes the data bases of the tdv-disk and ddv-disk CD-ROM.

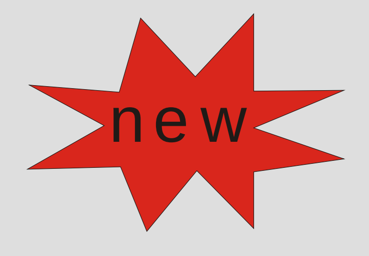

System requirements:
Windows 98/ME/NT/2000/XP/VISTA, Pentium III and a CD-ROM-Drive.
ISBN 978-3-937469-35-5 • Order-No. 403-08

Order online at http://shop.eca.de -
Demo version at http://trial.eca.de

The vrt comparison table

Equivalent Reference Tables for transistors, diodes, thyristors and ICs. Now as new edition 2008/2009 bigger, handy and more stable. This book series covers more than 160,000 types with more than 200,000 equivalent types.
Each type is provided with information as to device family, short-form description, manufacturer and the salient electrical data, along with the dimensioned outline drawing and pin assignments.
Includes a limited access of 10 data sheets from our online server at http://www.ecadata.de.
The type-related reference book index assists you in quickly finding further information on the online data base server http://www.ecadata.de , like pin out of ICs or other relevant information.

vrt volume 1 A...Z
Edition 2008/2009, now 1204 pages.
Size 17x24cm
ISBN 978-3-937469-33-1 • Order-No. 34-08

vrt volume 2 0..1N...2S..60 000...µ
Edition 2008/2009, 612 pages.
ISBN 978-3-937469-34-8 • Order-No. 35-08

Also on CD-ROM/DVD available, please refer to vrt-disk or the new vrt-dvd.

Order online at http://shop.eca.de -
Demo version at http://trial.eca.de

New edition 2005!

tdv-disk is the largest data base on CD-ROM for transistors and FET's. In version 2005 over 140,000 transistors and FET's from A...Z, 2N21... 2N7228 to 2...40 000...µ are listed. Included are the maximum and characteristic ratings, the PIN-outs, the manufacturers and the dimensioned outline drawings. Beside searching for types, the program permits a "selective search" according to the function and important data's like power and voltage. As all our other programs, tdv-disk has a extensive help system to make navigation easy and declare all the used abbreviations.

At a glance:

- Data Base with over 140,000 transistors and FET's
- Detailed function overview
- Completely reviewed and greatly extended
- A lot of search and selection abilities
- Maximum and characteristic ratings
- Dimensioned outline drawings
- Selector tables to find replacements
- SMD codes
- Manufacturer addresses and links to
- Additional the free ability to download data sheets as PDF
- Access to the tdv data base on our regularly updated online data base over the internet for maximal one year

System requirements:
Windows 98/ME/NT/2000/XP and a CD-ROM-Drive.
Multilingual: German, English

ISBN 3-937469-23-0
Order-No. 406-05

ddv-disk includes a complete data base about diodes and thyristors. This data base contains the data sheets of more than 90.000 different diodes and thyristors. We are proud to present one of the extensive data base about diodes and thyristors.Get all information and data at a glance. In the data sheet window, you will find all maximum ratings and stated characteristics like voltage, currents, power dissipation, temperature, circuit time, frequency, capacitance, replacement types, pinout, manufactureres, case outline

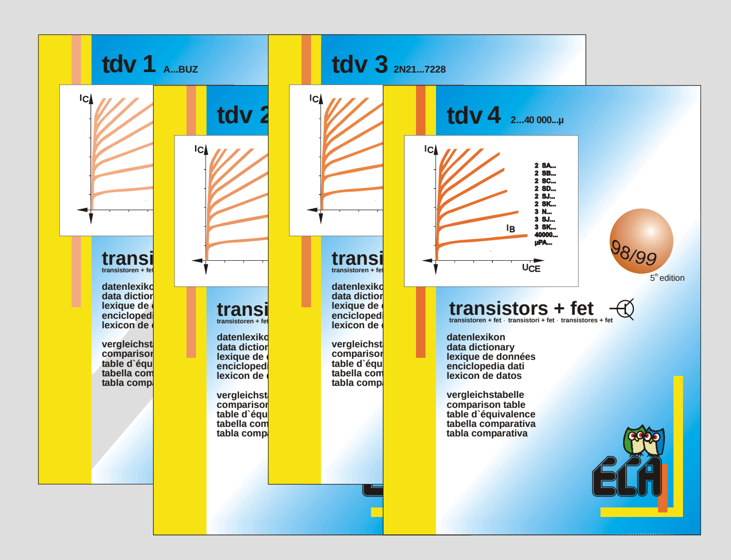

- Detailed function overview
- A completely reviewed and greatly extended data base
- Maximum and characteristic ratings
- Dimensioned outline drawings
- Selector tables to find replacements
- SMD codes
- Manufacturer addresses and links to their internet homepages
- Access to the ddv data base on our regularly updated online data base for maximal a year

Multilingual:German, English
System requirements:
Windows 98/NT/2000/XP and a CD-ROM-Drive.

ISBN 3-937469-26-5 Order-No.409/05

Order online at http://shop.eca.de -
Demo version at http://trial.eca.de

transistor

Series tdv: Transistors under control
Data Directories and Equivalents Tables giving the maximum and characteristic ratings of transistors and field-effect transistors along with their pin assignments. These books also including the dimensioned outline drawings and selector tables for quickly identifying equivalent types.

tdv 1 (A...BUZ)
6.enlarged edition 98/99, 416 pages, DIN A 4
ISBN 3-937469-09-5 Order-No. 101

tdv 2 (C...bis Z)
Out of stock, we are planing a new editions of this serie at the end of 2006. If someone is interessed ;-)

tdv 3 (2N21...2N7228)
Out of stock, we are planing new editions of this serie at the end of 2006. Please visit our home http://www.eca.de for more informations

tdv 4 (2...40 000...µ)
5.enlarged edition 98/99, 720 pages, DIN A 4
ISBN 3-937469-12-5 Order-No. 104

The updated version only on DVD or CD-ROM, refer to tdv-disk and vrt-dvd.

Order online at http://shop.eca.de -
Demo version at http://trial.eca.de

New edition 2005!

lin-disk is a database and equivalents table for operational amplifiers, analog switches, voltage comparators, linear voltage stabilizers, integrated fixed voltage regulators, adjustable and two-pole voltage regulators, Analogswitches and Multiplexer. The powerful search engine permits interrogating the data base not only according to type, furthermore it's also possible to select components by the manufacturer, the case, the pin assignment and the voltage.

At a glance:

- Over 30,000 different types
- Now with Analogswitches and Multiplexer
- Pin assignment, Manufacturer
- Dimensioned outline drawings
- Maximum and characteristic ratings
- Extensive search and selection possibilities
- New: Download possibility for original data sheets (PDF format)
- New: Type list with full text search

System requirements:
Windows 98/ME/NT/2000/XP, CD-ROM-Drive.
Multilingual: German, English
ISBN 3-937469-24-9 Order-No. 407-05

opto-disk 2006 New edition 2006!

Database and equivalents table for optical radiation transmitters (LEDs, IREDs, LED symbol displays, Laser Diodes, LED bars and arrays), radiation receivers (photodiodes and -transistors, Photo resistance, photo ICs, photo elements, solar cells and pyrodetectors), optocouplers having various input and output elements (photodiodes, -transistors and -darlingtons, digital ICs, amplifiers, photo FETs, SCRs and photo resistance), photo relays, photo interrupters, reflective sensors (photo reflective sensors) and adapted pairs of optical transmitters and receivers.

At a glance:

- All important data
- Dimensioned outline drawings
- Pin-out
- Download possibility of original data sheets (PDF) from our internet server
- Manufacturers with addresses and links to their internet homepages
- Free access to our online data base over the internet for one year

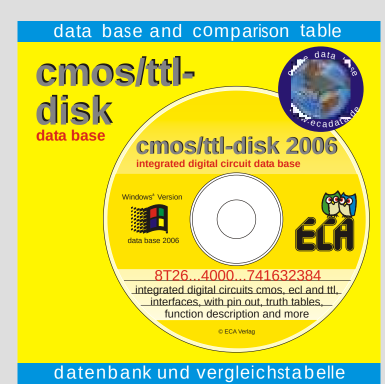

System requirements:
Windows 98/2000/XP and a CD-ROM-Drive.

Multilingual: German, English
ISBN 3-937469-25-7 Order No. 408-06

Order online at http://shop.eca.de -
Demo version at http://trial.eca.de

cmos/ecl/interface/ttl

New available as edition 2006!

cmos/ttl-disk is the new edition of our popular cmos 4000/7400, ECLl 10K/100K, TTL 7400 and Interfaces (T75) data dictionaries. The data base covers more than 95,000 integrated CMOS, TTL, ECL and T75 (interfaces) digital circuits (2635 families) including their maximum and characteristic ratings.

At a glance:

- Over 95,000 different types
- 2635 families
- Series 8T26 to 741632384
- Interfaces and ECL
- Improved search ability and more detailed description
- New selection ability
- Characteristics of all technologies
- Internal circuitry
- Dimensioned outline drawing
- Detailed specification of the functions
- Truth tables
- Information about applications and cases available
- Manufacturer (with address)
- Chip symbols by IEEE Standard 91
- Additional the free ability to download PDF and Modules (HSPICE, PSPICE, IBIS, SABER) from our data base server
- Online access to the corresponding data base of regularly updated data base in the internet

System requirements:
Windows 98/ME/NT/2000/XP and a CD-ROM-Drive.

Multilingual: German, English

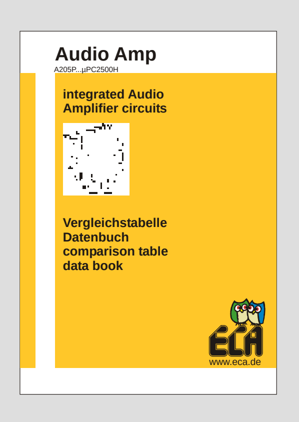

ISBN 3-937469-22-2 Order No. 405

ttl-lex is only in german language available.
Das ttl-lex entstand in dem Bestreben, dem Anwender unser, in vielen Jahren gesammeltes, Material über integrierte TTL-Schaltungen in einer Zusammenfassung zur Verfügung zu stellen. Anders als bei unserer Datenvergleichstabelle, die die wichtigsten Betriebs- und Grenzparameter jedes einzelnen Typs zusammenstellt, liegt beim ttl-lex der Schwerpunkt auf einer detaillierten Funktionsbeschreibung aller uns zugänglichen TTL-Schaltkreisfamilien, verbunden mit einer komprimierten Darstellung von mittleren Daten und von Grenzdaten der einzelnen Baureihen zu jeder TTL-Familie. Die Angaben sind so angeordnet, daß sie dem Leser nicht nur zur schnellen Orientierung über den Anwendungszweck eines Schaltkreises dienen, sondern es zugleich ermöglichen, sich umfassend über die Schaltungsfunktionen und über die Eigenschaften der verschiedenen TTL-Baureihen zu informieren. Das Typenspektrum umfaßt 809 Schaltkreisfamilien von 7400 bis 7450729 und damit beinahe alle bekannten TTL-Bausteine. Es entspricht dem unseres Datenlexikons, dadurch wird eine ideale Ergänzung dieser beiden ECA- Veröffentlichungen erreicht.

1.Auflage 06/97 1072 Seiten, DIN A 4
ISBN 3-937469-16-8

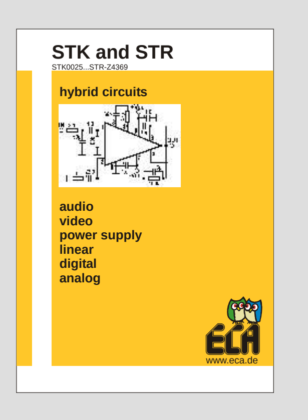

new

audio amp data book

New available!

The new data book about integrated audio amplifier. More than 3500 different types with schematic of connection, application, manufacturer, table of characteristics and replacements types.

ISBN 3-937469-18-4
Order-No. 115

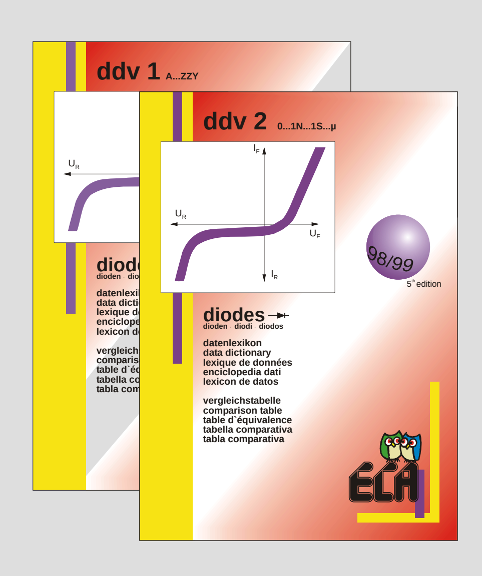

new

STK and STR data book

New available!

Data book about the common and very popular STK and STR hybrid circuits. All types with schematic of connection, application, manufacturer, table of characteristics and cross reference.

ISBN 3-937469-17-6
Order-No. 114

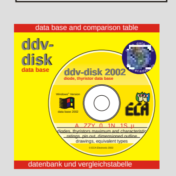

ddv data books

Series ddv: the well-tried diode directories Data Directories and Equivalents Table for diodes. Technical explanations; pin assignments; selector tables for selecting equivalent types; maximum and characteristic ratings; dimensioned outline drawings.

ddv 1 (A...ZZY)
Multilingual: German, English, French, Spanish, Italian
7th updated edition 1998/1999
484 pages, DIN A 4 ISBN 3-937469-13-3
Order-No. 32

ddv 2 (0...1N...1S...µ)
Multilingual: German, English, French, Spanish, Italian
5th. updated edition 1998/1999

vrt-dvd

The actual versions of the diodes and thyristor data books will be published as CD-ROM, please refer to vrt-dvd and ddv-disk.

Order online at http://shop.eca.de -

http://www.ecadata.de

online data base

With **http://www.ECADATA.DE** we created a platform, in order to give you the possibility of searching very fast for semiconductor data and replacement types direct in our constantly updated data bases.
The **new online data base** is available for all registered user at **http://www.ecadata.de/searchnew/** and includes all ECA data base. More than 1,000,000 different components and more than 300.000 Original data sheet in PDF format are available.
The following data bases are online and available:

- Analog circuits
- OP amplifier and comparators
- Voltage regulators
- Digital circuits
- CMOS 40
- CMOS 74
- ECL
- Interface (T75)
- TTL 74
- Diodes
- Mixed Signal
- A/D-D/A
- Amplifier driver
- Display
- Arrays discrete
- ASK ... QAM, PCM etc
- Delay, Tone, Volume
- En-, Decoder, CODEC
- Home Hobby cars
- IR, US, Remote, Wire, Bus
- Motor solenoids
- Prog. Logic Devices
- Signalimprovement
- µP, µC, PC round about
- Voltage round about
- Special Telecom
- Special consumers
- Switches, Sensors
- VHF, UHF, HF, FM, AM
- Clock, Frequency, Time
- Optoelectronic
- Optical Emitters
- Photo couplers/interrupters/sensor
- Radiation detectors
- Thyristors, Diacs, Triacs, UJT
- Transistors, FET, IGBT

The new online data base offers the ability to search for type, (with wildcards '?','*' for example BD?23 or 75*05) as well as the text search (like 'IGBT' also with Wildcards). The new search function for parametric for discrete components is now available. Additional we have for a large amount of types the original data sheet in PDF format. Through the rearrangement we have the possibility to update all changes, complements and extension in our data base immediately online.

If you couldn't find a special type we will help you.

All **registered customers of a ECA CD-ROM** can use the respective data base in our system.
Additionally we offer **different time-dependend on-line subscription.** All subscribers has full access to all available data bases.
For details please visit our online shop at
http://www.shop.eca.de.
